This section should provide a clear and concise description of the proposed research project. The focus is on self-limited research projects that are impactful in the current or future practice of emergency medicine and can be completed in a one-year time frame. This may include educational projects. Trainees should identify a faculty research mentor to guide them through the application and research process.

This portion of the grant should be divided into the following sections.

Specific Aims and Hypotheses. List the objectives and the goal of the specific proposed research, including the hypotheses of the study.

Significance. Provide a brief overview of the field to be studied, including what is known of the topic, what remains to be explored, and how the proposed research will advance understanding in the field or bridge gaps in knowledge. Include a rationale for conducting research in the proposed field (e.g., the area's significance to medicine broadly and to emergency medicine in particular, or potential for this area to serve as a launching point in the applicant's research career).

Innovation. Describe how the research will challenge and seek to shift current research or clinical practice paradigms by utilizing novel theoretical concepts, approaches or methodologies, instrumentation, or interventions.

Approach. Describe the overall strategy, methodology, and analyses in order to accomplish the specific aims of the project. Include a discussion of proposed inclusion and exclusion criteria, variables to be collected including well-defined outcome measures, statistical methods, anticipated sample size, and data management. This section may also incorporate preliminary data if appropriate.
